

TRIPLE LAYER

UNDERLAY

AXFELT™

THREE LAYERS OF COMFORT, WARMTH AND DURABILITY

ulster™

RECYCLED THREE LAYER CONTENT

Add warmth and comfort by starting with the perfect foundation.

Made from recycled materials, Axfelt Triple Layer Underlay is the sustainable choice for your home.

The secret is in the three layers. Instead of ending up in landfill, we divert waste textile materials to our factory in Devon where they are recycled, remade and renewed into our luxury underlay.

Each layer uses a different material to provide the perfect combination:

L A Y E R 1 – 100% recycled yarn and wool fibre

L A Y E R 2 – 100% recycled wool yarn and wool-rich carpet waste

L A Y E R 3 – 100% recycled rubber crumb made from recycled lorry and tractor tyres

The three layers are bound together with latex, and a polypropylene scrim is added to stabilise the layers, ensuring a high quality and long-lasting product. The final product contains more than 82% recycled content.

The benefits of using Axfelt Triple Layer Underlay go beyond sustainability.

Axfelt Triple Layer can help to significantly extend the life of your new carpet because it is different to most other underlays on the market.

10-YEAR GUARANTEE

We are so confident that Axfelt is the perfect partner for a woven Ulster carpet that any customer combining the two in their home will qualify for an extended guarantee of up to 10 years. That is an additional 4 years to the normal 6-year guarantee*.

THREE LAYER CONSTRUCTION

Most similar products on the market are made with a two layer construction. Our extra layer enhances crush recovery, with independent tests meeting the high standards of the BS4052 accreditation.

INSULATION

Wool is a natural sound and heat insulator on its own and this is further enhanced when included within a three layer construction. Axfelt Triple Layer delivers excellent thermal insulation properties of 2.7tog and sound insulation of 32d

SUPPORT

Unlike the smooth top on many foam underlays, the velcro effect between Axfelt Triple Layer's felt topping and the backing of a woven carpet creates a secure bond to hold it in place.

SEAMS

The added support between the wool felt top layer and the woven carpet backing is also particularly good at allowing seams to bed in, making them less pronounced once the carpet has settled after installation.

CONTRACT APPLICATIONS

Axfelt manufactures two underlays suitable for commercial projects.

Axfelt Triple Layer is contract rated so will provide long term support in carpet performance for certain commercial projects.

Axfelt Wool Felt Underlay has been specifically manufactured for commercial projects and, in particular, is suitable for hospitality guestrooms. This quality underlay can also be used in homes.

ULSTER CARPETS GROUP

Axfelt is part of the Ulster Carpets Group – one of the world's leading textile companies.

Established in 1938 in Northern Ireland, Ulster Carpets have grown to become the world's single-site producer of Axminster and Wilton carpets for the home and hospitality markets.

Building on this success, the company has expanded over the last 85-plus years to create a group of complementary companies that employs over 700 people worldwide.

Ranging from Danish-based commercial carpet manufacturer Danfloor, textile machinery experts GTM and wool processors Ulster Yarns, through to luxury interior brands Roger Oates Design, Solidwool and Alternative Flooring, the collective strength of the Ulster Carpets Group reflects the focus on innovation instilled by company founder, George Walter Wilson.

EVOLVE

OUR JOURNEY TO NET ZERO

Evolve encapsulates our all-encompassing approach to sustainability.

Exemplified by our proven history of innovation, our journey incorporates our products, our manufacturing, and our standards.

As part of this ongoing evolution, we have set - and continually review - ambitious targets to ensure that we reach our ultimate goal of becoming a Net Zero manufacturer.

Our approach to textile-to-textile waste is the perfect example of how we have evolved.

In the past, waste carpet and yarn from our manufacturing processes would have been sent to landfill where the wool would have naturally biodegraded. Now, we divert that waste to Devon where it is recycled, remade and renewed into Axfelt Triple Layer and Axfelt Wool Felt underlays.
